*Embedding?

Including a font file to express the clean letters without any crack in the environments that the font is not installed. It is unavailable with RixFontCloud license and a downloaded file is needed. ex.) webfont, embedding font file in server, device and software

License Guide

- RixFontCloud is a font service that makes users use the fonts during the subscription via RixFontCloud.
- All the works can still be used after expiration of subscription, within a range of the license.
- If you are looking for embedding, you can ask on the chatbot for an extra contract. [Talk to PIC](#)
- License of the calligraphies provided to the Master (Z) users are the same with the fonts.
